Please don't consider any of this document's recommendations to be advice in any of these areas. If you need advice in these areas, please see a qualified professional in that field.

Assumptions we've made

When giving advice, we make certain assumptions to demonstrate how the advice could affect your financial situation. We've based our advice on economic information and legislation that was current when we prepared your SoA.

All dollar amounts in this SoA are in today's dollars, even when we mention future income, expenses, investment amounts and so on. Naturally we can't predict what future inflation rates will be, so we can only make assumptions based on past trends. Also, all amounts listed in this document are "p.a." (per annum) unless otherwise stated or implied.

Product selection

We are committed to giving you the best products for your situation. When preparing your advice we considered and recommended only those products on Pareto Group's "Approved Product List". This list was compiled by a dedicated Investment Review Committee, which regularly reviews it. To see the complete product list, please ask us.

The Scope of Our Advice

In this statement of advice, the main focus is on:

- Retirement Planning
- Superannuation
- Transition to Retirement
- Salary sacrifice

This advice is based on information we have obtained from you. You must ensure the information is accurate and complete. Otherwise, this advice may be based on inaccurate or incomplete information relating to your investment objectives, financial situation or needs. You must therefore assess whether the advice is appropriate, in the light of your own individual investment objectives, financial situation or needs.

You recognise in each of the areas of advice we provide, we only provide advice to the extent we are able to under the relevant legislation.

Our Investment Recommendations

In respect of the specific investments we recommend as part of our advice you are entitled to a 14 day cooling off period for your initial investment. A cooling off period generally means a period of time after which you have provided your capital for investment, where you can change your mind and request for your capital to be returned to you.

Each fund manager or investment provider may implement the cooling off period in a slightly different manner. Therefore we recommend you refer to the Product Disclosure Statement for each of the recommended investments in order to understand the operation of each provider's cooling off period.

The Planning Process

Lesley, *Financial Planning* is a process to help you reach both your Personal and Financial Goals and Objectives. In order to achieve this we jointly need to undertake a number of tasks, including:

- ✓ Confirm your personal goals and lifestyle objectives;
- ✓ Quantify the resources required to meet your goals and objectives;
- ✓ Identify any gaps in your current plans and your stated goals and objectives;
- ✓ Develop suitable strategies to address any differences that may exist bearing in mind your attitude to investing and your risk profile;
- ✓ Conduct a regular review of the strategies we put into effect to ensure they keep pace with your changing needs, legislative changes and the investment environment.

Executive Summary

In this plan our advice considers the following areas of your financial circumstances.

Your Goals and Objectives

After our discussions I have listed below what we agreed were your key goals and objectives. The points listed below form the basis of the plan I have prepared, and therefore you should read them carefully now to ensure that we have an accurate foundation on which to proceed. If there are any modifications required, please advise us prior to the commencement of your financial plan.

Your goals and objectives are to:

- Take advantage of current superannuation legislation especially tax free income from age 60, and therefore seek advice on ways to transition monies from outside superannuation into the super environment.
- Review your superannuation contribution strategies with the aim of increasing your retirement savings in a tax effective manner.
- Review your superannuation portfolio.
- Minimise your tax commitments.

Recommendation Overview

Considering your stated goals and objectives, investor risk profile and age we recommend that you:

- Lesley, commence a non-commutable pre-retirement allocated pension with **\$217,534** made up of your Rest Super rolled over to the recommended pension platform. (See Colonial Wholesale Pension investment recommendation section). Your Rest Super fund will remain open to accept future contributions.
- Lesley, draw down an income stream of **\$12,000** per annum.
- Lesley, salary sacrifice **\$19,000 per annum** (\$1,583 per month) to your Rest Super Fund.
- Invest your funds in line with your Investor Risk Profile which is in line with that of a "Moderately Conservative" portfolio.

Anticipated Outcomes

Following our recommendations, we anticipate that:

- Your cash flow we anticipate will remain unchanged.
- Your total superannuation benefit after the first year will be around **\$4,150** higher than if you did nothing other than continued on as you are. We would expect a similar result each year until retirement. This is without taking into consideration any non-concessional contributions that may be made from year to year.
- Lesley, once you commence the recommended Transition to Retirement (TTR) strategy, we estimate that this will result in a combined tax saving of approximately **\$3,990** per annum.
- Your capital is invested inside the superannuation environment consistent with your current investor risk profile.
- You have re-structured your superannuation assets and increased the tax effectiveness of your retirement benefits upon commencement of an income stream.
- You have increased your superannuation contributions to build a capital base to meet your retirement income goals.

Future Strategies

- To annually review superannuation contributions, investment performance and cash flow requirements. We will aim to meet in May each year to review.
- Closer to retirement we will provide you with recommendations and advice relating to the retirement stage of your financial plan.

Income Surplus	\$0

You have provided us with the above figures in the table. If the estimated Cash Flow Surplus may be over or understated please notify us if this is the case.

Your Investor Risk Profile

The following section of your plan helps to ensure that I clearly understand your attitude to investment selection. Additionally, investments contain various characteristics, which may or may not suit each individual investor.

Based upon your responses to the Risk Profile Questionnaire, **it was determined you can be considered a “Moderately Conservative” investor.**

- The Moderately Conservative investor seeks a diversified portfolio with a balance of defensive and growth assets.
- This requires an investment time horizon of between 3 – 5 years.
- The portfolio would include a high portion of income bearing securities such as cash and fixed interest, with a small exposure to equities and property providing appreciation potential

A Moderately Conservative investor will typically diversify their investment in the following manner:

Australian Shares	24%
International Shares	14%
Fixed Interest	38%
Property	10%
Cash	14%

Our research indicates that long term returns will be best achieved through a diversified portfolio covering all major asset classes (i.e. Cash, Fixed Interest, Shares and Property).

By covering all primary investment markets the risks and volatility of your investments can be managed to levels consistent with your investment profile, whilst maintaining the potential for long term growth.

If you feel the above investor profile does not reflect your attitude as an investor, or the recommended portfolio contained in this report is too aggressive or conservative, please let me know so I may adjust my recommendations accordingly.

Our recommendation has been made given your risk tolerance, while in balance with your goals and objectives.

Strategy Recommendation

Superannuation Funds

Recommendations:

- Lesley, commence a non-commutable pre-retirement allocated pension with **\$217,534** made up of your Rest Super rolled over to the recommended pension platform. Your Rest Super fund will remain open to accept future contributions.
- Lesley, draw down an income stream of **\$12,000** per annum.
- Lesley, salary sacrifice **\$19,000 per annum** (\$1,583 per month) to your Rest Super Fund.
- Invest your funds in line with your Investor Risk Profile which is in line with that of a “Moderately Conservative” portfolio.

Benefits:

- A sector specific asset allocation strategy takes advantage of expert fund managers who specialise in that single sector.
- You will have access to a wide range of investment options with access to more than one specialist manager within each asset class.
- The recommended wholesale fund platform has a wide range of investment options with access to more than one specialist manager within each asset class.
- Your superannuation benefits will be invested under a cost effective investment platform that provides all the characteristics you will need approaching retirement.
- You will gain ongoing advice from us as your financial adviser as we will have full access to information relating to the recommended superannuation fund. This will enable us to provide thorough and timely advice to you.

Risks:

- The recommended investment’s performance is subject to market fluctuations.
- Investment performance is not guaranteed.

Transition to Retirement

The aim of a 'Transition to Retirement' strategy is to utilise current legislation to increase superannuation contributions whilst remaining cash flow neutral.

Current legislation allows you (as you have reached preservation age) to commence a non-commutable income stream with your superannuation monies without having to satisfy a condition of release. From age 60, all income received from this income stream are tax free.

The minimum pension amount that you can draw is 4% of your account balance per annum whilst the maximum pension is 10% and is re-calculated in July each year.

The additional income received from your pre-retirement income stream allows you to make additional contributions to superannuation in the form of salary sacrifice. Salary sacrifice contributions are pre-tax contributions and therefore result in a reduction of assessable income. These superannuation contributions are concessional taxed at a maximum of 15% as opposed to marginal tax rates of up to 47%.

The 'Transition to Retirement' strategy results in an increased net inflow to superannuation and therefore a maximisation of your retirement savings in a tax effective manner.

Pre-Retirement Income Stream

Recommendations:

- Lesley, commence a non-commutable pre-retirement allocated pension with **\$217,534** made up of your Rest Super rolled over to the recommended pension platform. Your Rest Super fund will remain open to accept future contributions.
- Lesley, draw down an income stream of **\$12,000** per annum.
- This pension income is to be used to supplement your income that you will salary sacrifice to super.
- By commencing a pre-retirement income stream you are increasing your income in a tax effective manner and therefore allowing you to commence a salary sacrifice arrangement.
- There is an immediate income tax benefit on withdrawal and re-contribution via salary sacrifice, as a result of this strategy.
- The income from a pre-retirement income stream is tax effective income, in that you will receive such benefits as:
 - A deductible amount for tax purposes – which reduces your taxable income.
 - Ability to draw down income from the pension tax free.

Risks:

- Your income stream capital is subject to market performance fluctuations which may have a flow on effect to your income received.
- **A condition of the transition to retirement income stream is that it is non-commutable – no lump sum withdrawals can be made until you satisfy a condition of release.**

Salary Sacrifice to Superannuation

Recommendation:

- Lesley, salary sacrifice \$19,000 per annum (\$1,583 per month) to your Rest Super Fund.
- Arrange this with your employer/payroll as soon as possible.

Benefits:

- Salary sacrifice contributions are made with pre-tax dollars and therefore you will receive a reduction in taxable income for the contributions that you make.
- Lesley, your salary sacrifice contributions will be taxed at a maximum of 15% compared to the 32.5% if taken as income.
- **The total tax saving for a full financial year is estimated to be \$3,990.**
- **You have increased your NET superannuation contributions by \$4,150 p.a. to build a capital base to meet your retirement income goals.**

Risks:

- Superannuation benefits are subject to market returns and earning rates are not guaranteed.

IMPORTANT:

It is important that any salary sacrifice arrangement is clearly documented in writing. You should also confirm with your employer that they are going to continue to pay Superannuation Guarantee Contributions (SGC) on the grossed up amount of your package, i.e. that the SGC will continue to be calculated on the total of your salary + salary sacrificed amount.

Non Superannuation Products

Yes, when making non superannuation product recommendations I can only choose products from our Approved Product List (APL). This list is compiled by a dedicated Investment Committee, made up of Research Manager, Directors and Representatives who carefully analyse investment products, prior to including any product on the APL. The Committee utilises leading industry research houses to assist with their analysis.

The APL is regularly reviewed to ensure that all funds, managers and investment companies continue to meet our ongoing stringent requirements.

Superannuation Products

Yes, when making superannuation product recommendations I can only choose products from our Approved Product List (APL). However, if you have a superannuation product that is not on our APL, I am still able to make recommendations in relation to that fund providing I have conducted the necessary research and have a thorough knowledge of the fund.

What is My Responsibility to You?

I am responsible for providing you a 'clear, concise & an effective' method of communicating my recommendations to you. The recommendations are based on your goals and objectives, personal and financial situations, and other information collected from you. The recommendations are appropriate for your needs and current situation.

As the SoA is specifically prepared for you and based on your situation, I do not take any responsibility for any third party persons acting on all or on a part of any advice or recommendations made in this SoA.

Do I Guarantee the Investments I have recommended?

No. By law, the investments I have recommended must be appropriate to you, however, I do not guarantee that the recommended investments are the best for you or that they will perform in a certain way.

Your Financial Plan

In preparing this plan we have taken into account your specific goals and objectives, and have designed an appropriate strategy that aims to accomplish these.

It is important to appreciate that we live in an ever changing world. Accordingly, it is probable that, overtime, the basis of our calculations (inflation rates, investment rates etc.) will change, as will your own requirements and expectations. It is therefore recommended you review your plan on a regular basis to ensure you are still on track to achieve investment objectives.

It is essential to have your investment portfolio reviewed to ensure that the investments are working to their maximum potential and any changes to the investment markets, taxation etc. are promptly and correctly responded to.
