If that happens, please ask us to review your situation before taking any action.

Check for accuracy

This SoA is based on the information you provided. Please read the document carefully, checking that your details are correct and that no important facts are missing. If anything is wrong or missing, please let us know immediately—otherwise our advice may be based on incorrect information and may not be right for you.

Limitations of our advice

We cannot give advice on:

- Trust or business structures
- Taxation
- General insurance
- Direct share or property purchases
- Legal matters

Please don't consider any of this document's recommendations to be advice in any of these areas. If you need advice in these areas, please see a qualified professional in that field.

Assumptions we've made

When giving advice, we make certain assumptions to demonstrate how the advice could affect your financial situation. We've based our advice on economic information and legislation that was current when we prepared your SoA.

All dollar amounts in this SoA are in today's dollars, even when we mention future income, expenses, investment amounts and so on. Naturally we can't predict what future inflation rates will be, so we can only make assumptions based on past trends. Also, all amounts listed in this document are "p.a." (per annum) unless otherwise stated or implied.

Product selection

We are committed to giving you the best products for your situation. When preparing your advice, we considered and recommended only those products on Pareto Group's "Approved Product List". This list was compiled by a dedicated Investment Review Committee, which regularly reviews it. To see the complete product list, please ask us.

Each fund manager or investment provider may implement the cooling off period in a slightly different manner. Therefore, we recommend you refer to the Product Disclosure Statement for each of the recommended investments in order to understand the operation of each provider's cooling off period.

The Planning Process

Glenn, *Financial Planning* is a process to help you reach both your Personal and Financial Goals and Objectives. In order to achieve this, we jointly need to undertake a number of tasks, including:

- ✓ Confirm your personal goals and lifestyle objectives;

- ✓ Identify any gaps in your current plans and your stated goals and objectives;
- ✓ Develop suitable strategies to address any differences that may exist bearing in mind your attitude to investing and your risk profile;
- ✓ Conduct a regular review of the strategies we put into effect to ensure they keep pace with your changing needs, legislative changes and the investment environment.

Executive Summary

In this plan our advice considers the following areas of your financial circumstances.

Your Goals and Objectives

After our discussions I have listed below what we agreed were your key goals and objectives. The points listed below form the basis of the plan I have prepared, and therefore you should read them carefully now to ensure that we have an accurate foundation on which to proceed. The 'Total' column indicates the value of assets and liabilities which are owned by you. This report does not show the value of any portion of the asset or liability that may be owned by a third party or associated entity.

Your Investor Risk Profile

The following section of your plan helps to ensure that I clearly understand your attitude to investment selection. Additionally, investments contain various characteristics, which may or may not suit each individual investor.

Based upon your responses to the Risk Profile Questionnaire, it was determined that you can be classified as a Balanced investor.

Typically, a **Balanced** investor has the following characteristics:

- The Balanced investor will typically operate a portfolio evenly split between interest bearing securities and growth-oriented investments.
- An exposure to a range of investment sectors including cash, fixed interest, property and shares ensures the portfolio is “truly” balanced.
- Investors are typically comfortable with a variability of their capital over a 5-year horizon while their portfolio builds a growing income stream and capital growth.

A Balanced investor will typically diversify their investment in the following manner:

Australian Shares	34%
International Shares	20%
Fixed Interest	26%
Property	14%
Cash	6%

Our research indicates that long term returns will be best achieved through a diversified portfolio covering all major asset classes (i.e. Cash, Fixed Interest, Shares and Property).

By covering all primary investment markets, the risks and volatility of your investments can be managed to levels consistent with your investment profile, whilst maintaining the potential for long term growth. Any recommendation will be based on your risk tolerance, while in balance with your goals and objectives.

Strategy Recommendation

Tax Rates

When assessing the most tax effective environment for your investment assets, we need to consider the tax that would be payable on any income that these investments will generate. The current tax rates are as follows:

Income Earned in your personal name

Tax rates 2018-19

<i>Taxable income</i>	<i>Tax on this income</i>
\$1 – \$18,200	Nil
\$18,201 – \$37,000	19c for each \$1 over \$18,200
\$37,001 – \$90,000	\$3,572 plus 32.5c for each \$1 over \$37,000
\$90,001 – \$180,000	\$19,822 plus 37c for each \$1 over \$87,000
\$180,001 and over	\$54,232 plus 45c for each \$1 over \$180,000

* The above rates **do not** include the Medicare levy of 2.0%.

Income Earned in the superannuation environment

Superannuation in 'accumulation' phase	-	Tax rate = 15%
Superannuation in 'pre-retirement pension' phase	-	Tax rate = 15%
Superannuation in 'allocated pension' phase	-	Tax rate = 0%

Tax on superannuation earnings, contributions and income streams

Investments Currently Outside of Superannuation

- Peter, you currently have the following investments in your personal name:

Cash	\$700,000
------	-----------

- You seek advice with respect to the best use of these funds but wish to keep approximately \$80,000 for house renovations.

Recommendation:

- Peter, in light of the fact that superannuation is a tax effective environment to hold investment assets, we recommend to make a Personal Non-Concessional contribution of \$100,000 prior the end of the current financial year (FY18/19).
- In July 2019, we recommend making a Personal Non-Concessional contribution of \$300,000 using the “bring forward rule” (these contributions remain within the contribution caps detailed in the ‘Superannuation Contribution Limits’ section).

Benefits:

- As your superannuation fund is nearing ‘pension phase’, any assets held within the fund are effectively being held in the most tax effective environment.
- The returns on balances held within superannuation and invested should be higher than the current returns on cash held in bank deposits.

Risks:

- Superannuation benefits are subject to market returns and earning rates are not guaranteed.

Surplus Funds

- After making the recommended Personal Non-Concessional Contributions and taking into account the fact that you require approximately \$80,000 for house renovations, you will then have surplus funds of approximately \$220,000.
- You seek guidance regarding the most appropriate use of these funds.

Recommendation:

- We would suggest placing \$118,000 in an offset account against your current debt.
- Retain the remaining \$102,000 in your bank account to assist with cash flow after the implementation of the recommended salary sacrifice arrangement.

Basis for the recommendation:

- By placing \$118,000 in an offset account, you will no longer incur interest on this debt. The gross saving is estimated to be approximately \$4,980 p.a. (i.e. \$118,000 @ 4.22% interest).
- Holding cash reserves will assist with cash flow and provide you with flexibility in terms of potential future investments and super contributions, noting that the Australian and Global markets are experiencing a certain level of uncertainty.

Salary Sacrifice to Superannuation

Peter, you are currently receiving Superannuation Guarantee (SG) contributions of approximately \$10,000 per annum. The concessional superannuation contribution cap is \$25,000 per annum.

Recommendation:

- Peter, consider making salary sacrifice or personal concessional contributions to superannuation up to the maximum limit each year. This would equate to personal contributions of \$15,000 p.a.). The associated tax benefit is outlined on the following page.

Benefits:

- Salary sacrifice contributions are made with pre-tax dollars and therefore you will receive a reduction in taxable income for the contributions that you make.
- Peter, your salary sacrifice contributions will be taxed at a maximum of 15% compared to the 37% if taken as income.
- **The total tax saving for a full financial year is \$1,807.**
- **You have increased your combined NET superannuation contributions by \$12,750 p.a. to build a capital base to meet your retirement income goals.**

Risks:

- Superannuation benefits are subject to market returns and earning rates are not guaranteed.

IMPORTANT:

It is important that any salary sacrifice arrangement is clearly documented in writing. You should also confirm with your employer that they are going to continue to pay Superannuation Guarantee Contributions (SGC) on the grossed-up amount of your package, i.e. that the SGC will continue to be calculated on the total of your salary + salary sacrificed amount.

Superannuation – Pension Phase and Retirement Income Streams

Peter, as you are close to reaching preservation age in February 2019, current legislation allows you (once reached preservation age) to commence an income stream with your superannuation monies. From age 60, all income received from this income stream is tax free.

Previously, once you commenced an income stream all income on the amount funding the income stream was tax free as opposed to being taxed at 15% when in accumulation phase. However, from 1st July 2017 the taxation of earnings in pension phase continues to apply to 'transition to retirement' income streams where *preservation age has been reached and you have not yet retired*.

The minimum pension amount that you must draw is 4% per annum whilst the maximum pension you can draw is 10%, with the specific amounts being re-calculated in July each year.

Recommendations:

- Consider moving your superannuation from 'accumulation' to 'pension' phase, only if you do not have the ability to make the maximum personal concessional contributions to superannuation each year.

Benefits:

- The income stream assists in meeting your cash flow requirements in a tax effective manner.

Retirement Projections

Peter, we also have taken the liberty of providing retirement projections based on two scenarios.

Under each of these scenarios we have calculated your projected capital position based on the following assumptions:

- Capital value of superannuation increases by 6.0% p.a.
- Capital value of IOOF Managed Fund increase by 5.0% p.a.
- Cash earning rate of 2.0% p.a.

Scenario 1 – current situation

- Retain your surplus funds outside of superannuation invested in cash
- Retain your existing superannuation structure

Scenario 2

- Before June 30, 2019, contribute \$100,000 into recommended superannuation fund as a non-concessional contribution.
- In July 2019, contribute \$300,000 into the recommended superannuation fund by making a non-concessional contribution utilising the 'bring forward' rule.
- Invest the funds under a master trust platform in a 'Balanced' style portfolio.
- Make annual salary sacrifice / personal concessional superannuation contributions of \$15,000.

Planning – Investment Recommendations

A summary of these projections at **age 60, 62, 64 and 67** is detailed in the following table:

Scenario	Retirement Age	Investment assets outside of super	Retirement Capital (superannuation)	Total Assets
1	60	\$634,716	\$909,231	\$1,543,948
	62	\$730,677	\$973,663	\$1,704,341
	64	\$838,499	\$1,043,050	\$1,881,549
	67	\$1,025,727	\$1,157,393	\$2,183,121
2	60	\$359,525	\$1,129,897	\$1,489,423
	62	\$401,750	\$1,312,298	\$1,714,048
	64	\$448,030	\$1,517,243	\$1,965,274
	67	\$525,954	\$1,873,120	\$2,399,075

A copy of the calculations used to derive the different outcomes detailed above is contained in the appendix at the rear of this Statement of Advice.

Planning – Investment Recommendations

Assuming conservative returns of 5% p.a. and 7% p.a. on superannuation and investment capital, the following income would be generated without eroding any capital:

	Retirement Age	Investment Capital	Return on Capital	Annual Income generated
Scenario 1	60	\$1,543,948	5%	\$77,197
			7%	\$108,076

Estate Planning

Although considerable emphasis is placed on wealth creation and protection, a third vital aspect of your financial strategy is the control of the manner in which your wealth will be distributed after your death.

The expression “Estate planning” represents the concept of the planning and documentation of your wishes for the distribution of your wealth following death, whether the assets are held personally or controlled by related entities such as trusts or companies.

Estate planning is a specialised area, and it is important that you obtain professional advice in relation to all areas of your estate plan. However, we outline below some of the issues you should consider in designing your estate plan.

Wills and Testamentary Trusts

A Will is the first step in ensuring that the distribution of your estate is actioned in accordance with your wishes. If you die without a Will (intestate), it may be that a court will control both the manner of distribution of your estate and the persons to whom your estate is distributed, and this can cause unnecessary distress.

You currently have a basic Will in place.

Recommendation:

- **We have an arrangement with Lakeside Lawyers Pty Ltd who can assist with the implementation of an appropriate Will as soon as possible.**

It is important to ensure your Will:

- Nominates executors (and substitute executors) who are likely to survive you and who clearly understand your wishes.
- Nominates beneficiaries in relation to every segment of your estate and nominates alternative beneficiaries should your primary beneficiaries predecease you.
- Bequeaths monetary value or a percentage of your estate rather than a specific asset, as there is the risk that an asset may not be in existence at the time of distribution of the estate.
- Includes provision for the establishment of a testamentary trust, which can be a tax effective tool for distributing your estate.

Benefits:

- Peace of mind, knowing all your wishes are detailed to be carried out, and plans articulated for your immediate family to be adequately provided for in the event of your death.
- If your Will incorporates a testamentary trust, your assets would pass into a discretionary trust (or multiple trusts) and be held for the benefit of your beneficiaries, (rather than directly by them).
- This could be determined on an annual basis having regard to each beneficiary's personal income and taxation circumstances (importantly, income distributed from a testamentary trust to minors is taxed at normal adult marginal tax rates), as well as family circumstances (assets held within a testamentary trust may provide some protection in the event of family breakdown or bankruptcy).

Non-Estate Assets

It is important your estate planning arrangements incorporate your entire asset base.

Recommendation:

- **We recommend you consult an approved legal practitioner. We have an arrangement with Lakeside Lawyers Pty Ltd who will be able to assist you with this.**

Although a Will constitutes a vital part of your estate planning arrangements, not all of your assets are automatically subject to the provisions of a Will. Examples of such 'assets' are as follows:

- Superannuation assets – the Trustee of a superannuation fund is required to distribute your superannuation monies (including any life insurance benefits paid as a result of the death of the member) in accordance with the Trust Deed. You usually have the option of informing the Trustee of your preferences in relation to the distribution of your funds, but this may or may not be binding on the Trustee.
- Jointly held assets – if assets are held as 'joint tenants', then upon the death of one of the owners the asset automatically passes in full to the other owner (no matter what is said in the Will of the deceased co-owner). On the other hand, assets held as 'tenants in common' are able to be disposed of as part of a Will.
- Life insurance policies – depending on the ownership of the policy, benefits can be paid to the following - the deceased's estate and therefore distributed through their Will (when the owner of the policy is also the insured person) - a person who has been nominated as the beneficiary of a policy by the deceased owner (in which case the beneficiary automatically receives the proceeds of the policy) - or any third party who owns the policy.
- Assets owned by a Trust – these assets are legally owned by the Trustee of the Trust and therefore are not able to be dealt with through a person's Will.

(Note: In recent times, the use of Trusts as an estate planning vehicle has become wide spread and your solicitor or other business adviser should be consulted if you wish to exercise a measure of control over the way in which Trust assets are managed or distributed. For example if a company acts as trustee for a Trust, you may retain an interest in the company and therefore the trust by owning shares in that company.)

- Assets owned by a company – only the deceased's shares in the company may be dealt with through their Will.

Powers of Attorney

This element of your estate plan is designed to be implemented prior to your death so that your affairs can be conducted appropriately.

You currently do not have Powers of Attorney in place.

Recommendation:

- **We recommend you consult an approved legal practitioner to ensure they are prepared as soon as possible.**
- **We have an arrangement with Lakeside Lawyers Pty Ltd who will be able to assist you with this.**
- **We recommend you consult Lakeside Lawyers Pty Ltd for a review every three years.**

There are three 'standard' types of Power of Attorney:

- A general Power of Attorney which can provide the donee with restricted or unrestricted authority over the donor's financial affairs (but not their health care). Such a policy lapses if the donor loses mental capacity.
- An enduring Power of Attorney which provides the donee with authority over the donor's financial affairs (but not their health care) until they die (i.e. it extends beyond any loss of mental capacity).
- An enduring medical Power of Attorney which provides the donee with authority over the medical needs of the donor if the donor himself is unable to make such decisions (whether temporarily or permanently).

Note 1 - A Power of Attorney may only be granted by someone who is over the age of 18 and who is of sound mind at the time of the grant and capable of fully understanding the nature and purpose of the document they are signing.

Note 2 - The attorney is not able to do anything illegal while operating under a Power of Attorney, nor is he/she able to sign a Will on behalf of the donor, or to transfer the Power of Attorney to someone else unless authorised to do so.
