Timeframe for our advice

Our recommendations in this SoA are valid for 30 days from the preparation date on the cover of this document. If your circumstances change before you implement our recommendations, or if you don't act on them within 30 days, they may no longer be appropriate for you. If that happens, please ask us to review your situation before taking any action.

Check for accuracy

This SoA is based on the information you provided. Please read the document carefully, checking that your details are correct and that no important facts are missing. If anything is wrong or missing, please let us know immediately—otherwise our advice may be based on incorrect information and may not be right for you.

Limitations of our advice

We cannot give advice on:

- Trust or business structures
- Taxation
- General insurance
- Direct share or property purchases
- Legal matters

Please don't consider any of this document's recommendations to be advice in any of these areas. If you need advice in these areas, please see a qualified professional in that field.

Assumptions we've made

When giving advice, we make certain assumptions to demonstrate how the advice could affect your financial situation. We've based our advice on economic information and legislation that was current when we prepared your SoA.

All dollar amounts in this SoA are in today's dollars, even when we mention future income, expenses, investment amounts and so on. Naturally we can't predict what future inflation rates will be, so we can only make assumptions based on past trends. Also, all amounts listed in this document are "p.a." (per annum) unless otherwise stated or implied.

Product selection

We are committed to giving you the best products for your situation. When preparing your advice, we considered and recommended only those products on Pareto Group's "Approved Product List". This list was compiled by a dedicated Investment Review Committee, which regularly reviews it. To see the complete product list, please ask us.

If this advice includes a recommendation to you to acquire a particular financial product (other than securities) or an offer to issue or arrange the issue of a financial product to you, we will also provide you with a Product Disclosure Statement containing information about the particular product to help you make an informed decision about that product.

The Scope of Our Advice

In this statement of advice, the main focus is on:

- Structure and ownership of current and future investments
- Superannuation contribution strategies
- Superannuation structure
- Overall retirement planning

This advice is based on information we have obtained from you. You must ensure the information is accurate and complete. Otherwise, this advice may be based on inaccurate or incomplete information relating to your investment objectives, financial situation or needs. You must therefore assess whether the advice is appropriate, in the light of your own individual investment objectives, financial situation or needs.

You recognise in each of the areas of advice we provide, we only provide advice to the extent we are able to under the relevant legislation.

Our Investment Recommendations

In respect of the specific investments, we recommend as part of our advice you are entitled to a 14-day cooling off period for your initial investment. A cooling off period generally means a period of time after which you have provided your capital for investment, where you can change your mind and request for your capital to be returned to you.

Each fund manager or investment provider may implement the cooling off period in a slightly different manner. Therefore, we recommend you refer to the Product Disclosure Statement for each of the recommended investments in order to understand the operation of each provider's cooling off period.

The Planning Process

Wayne and Sharon, *Financial Planning* is a process to help you reach both your Personal and Financial Goals and Objectives. In order to achieve this, we jointly need to undertake a number of tasks, including:

- ✓ Confirm your personal goals and lifestyle objectives;
- ✓ Quantify the resources required to meet your goals and objectives;
- ✓ Identify any gaps in your current plans and your stated goals and objectives;
- ✓ Develop suitable strategies to address any differences that may exist bearing in mind your attitude to investing and your risk profile;
- ✓ Conduct a regular review of the strategies we put into effect to ensure they keep pace with your changing needs, legislative changes and the investment environment.

Executive Summary

In this plan our advice considers the following areas of your financial circumstances.

Your Goals and Objectives

After our discussions I have listed below what we agreed were your key goals and objectives. The points listed below form the basis of the plan I have prepared, and therefore you should read them carefully now to ensure that we have an accurate foundation on which to proceed. If there are any modifications required, please advise us prior to the commencement of your financial plan.

Your goals and objectives are to:

- Generate a net income of \$60k to \$80k in retirement.
- Review your superannuation portfolio to determine appropriate strategies and structure moving forward.
- Place your current and future assets under the most tax effective ownership structure.
- Consider appropriate superannuation contribution strategies.
- Ensure you have sufficient cash flow in retirement.
- Consider appropriate strategies in how best to utilise the monies from the eventual sale of your Residential Home and monies in your saving account.

This report does not show the value of any portion of the asset or liability that may be owned by a third party or associated entity.

Your Investor Risk Profile

The following section of your plan helps to ensure that I clearly understand your attitude to investment selection. Additionally, investments contain various characteristics, which may or may not suit each individual investor.

Based upon your responses to the Risk Profile Questionnaire, it was determined that **Wayne** has a **Balanced** investor risk profile, and **Sharon** also has a **Balanced** investor risk profile in regard to investments inside superannuation.

Typically, a **Balanced** investor has the following characteristics:

- A Balanced investor places greater emphasis on capital appreciation with current income and asset preservation being of a secondary concern.
- This requires an investments time horizon of between 5 – 7 years.
- Their portfolio would typically comprise an overweight holding in shares and property with a small exposure to income bearing securities such as cash and fixed interest.

A Balanced investor will typically diversify their investment in the following manner:

Australian Shares	34%
International Shares	20%
Fixed Interest	26%
Property	14%
Cash	6%

Our research indicates that long term returns will be best achieved through a diversified portfolio covering all major asset classes (i.e. Cash, Fixed Interest, Shares and Property). By covering all primary investment markets, the risks and volatility of your investments can be managed to levels consistent with your investment profile, whilst maintaining the potential for long term growth. Any recommendation will be based on your risk tolerance, while in balance with your goals and objectives.

Strategy Recommendation

Tax Rates

When assessing the most tax effective environment for your investment assets, we need to consider the tax that would be payable on any income that these investments will generate. The current tax rates are as follows:

Income Earned in your personal name

Tax rates 2021-22

<i>Taxable income</i>	<i>Tax on this income</i>
\$1 – \$18,200	Nil
\$18,201 – \$45,000	19c for each \$1 over \$18,200
\$45,001 – \$120,000	\$5,092 plus 32.5c for each \$1 over \$45,000
\$120,001 – \$180,000	\$29,467 plus 37c for each \$1 over \$120,000
\$180,001 and over	\$51,667 plus 45c for each \$1 over \$180,000

* The above rates **do not** include the Medicare levy of 2.0%.

Income Earned in the superannuation environment

Superannuation in 'accumulation' phase	-	Tax rate = 15%
Superannuation in 'pre-retirement pension' phase	-	Tax rate = 15%
Superannuation in 'allocated pension' phase	-	Tax rate = 0%

Tax on superannuation earnings, contributions and income streams

	Non-superannuation	Super accumulation and pre-retirement pension phase	Super allocated pension phase
			After age 60
Salary/pension income	Marginal tax rate (max 45% + medicare)	n/a	Tax free
Super contributions (SGC, salary sacrifice)	n/a	15%	n/a
Investment income	Marginal tax rate (max 45% + medicare)	Maximum 15%	Tax free*
Capital gains	Marginal tax rate (50% discount if held for more than 12 months)	10% (15% if asset held less than 12 months)	Tax free*

Investments Currently Outside of Superannuation

- Wayne and Sharon, you currently have total cash at bank of approximately \$95,000.
- You would like to retain \$45,000 in cash and seek advice with respect to the remaining \$50,000.

Recommendation:

- In light of the fact that superannuation is a tax effective environment to hold investment assets, we recommend to make a personal non-concessional superannuation contribution of \$50,000.
- This contribution is to be made by Sharon as Sharon currently has the smaller superannuation balance.

Benefits:

- Any assets held within the fund are effectively being held in the most tax effective environment.
- The returns on balances held within superannuation and invested should be higher than the current returns on cash held in bank deposits.

Risks:

- Superannuation benefits are subject to market returns and earning rates are not guaranteed.

Work Test

Currently, the work test must be satisfied in order for the trustee of a super fund to accept member contributions or voluntary employer contributions if the member is age 67 or over at the time of the contribution, but is under the maximum age for that type of contribution.

A member satisfies the work test if they have been gainfully employed for at least 40 hours in a period of not more than 30 consecutive days in the financial year.

However, from 1 July 2022, a super fund can accept any contributions made for a member while they are under the age of 75 (including the period up to 28 days after the end of the month in which they turn 75), **regardless of their work status**.

Superannuation – Pension Phase and Retirement Income Streams

Wayne and Sharon, current legislation allows you (as you have reached preservation age) to commence an income stream with your superannuation monies. From age 60, all income received from this income stream is tax free.

Once you have commenced an income stream all income earned from the amount funding the income stream is also tax free, as opposed to being taxed at 15% when in accumulation phase. Income that is taxed within the super fund includes distributions and any capital gains realised via the selling of units.

Recommendations:

- As you have both entered retirement, you will therefore need to draw an income stream from your superannuation monies to satisfy living expenses.
- It is therefore recommended that each of you convert your superannuation to pension phase.

Reasons:

- By implementing this structure, your superannuation fund will no longer incur 15% tax on earnings within the fund.
- You will receive a regular 'tax free' income stream to satisfy your cash flow needs.

For Consideration:

- The minimum income stream that must be drawn from the Allocated Pension is:

Age	Under 65	65–74	75–79	80–84	85–89	90–94	95 or over
Reduced percentage factor (2019–20 and 2020–21 financial years)	2%	2.5%	3%	3.5%	4.5%	5.5%	7%
Standard percentage factors (other years)	4%	5%	6%	7%	9%	11%	14%

Superannuation Funds

Wayne and Sharon, you currently have the following approximate superannuation balances:

Wayne

➤ AMP – Signature Super \$628,418

Sharon

➤ BT Super for Life \$500,414

TOTAL \$1,128,832

Recommendations:

- Roll across these superannuation monies to a more actively managed Colonial First State Wholesale Allocated Pension invested in a 'Balanced' portfolio aligned with your Investor Risk Profile.

Investment Recommendation

Colonial FirstChoice Wholesale Investments

The FirstChoice Investments is a multi-manager investment solution which combines wide investment choice with a competitive and simple fee structure, backed up by a high standard of service support from Colonial First State.

A minimum total investment of \$5,000 (\$1,500 for super) is required to establish an account in FirstChoice Investments. A \$1,000 minimum initial balance is required if a regular investment plan is set up at commencement of the account. The minimum regular investment plan amount is \$100 per month.

Reasons and Benefits

The major features of the Colonial FirstChoice Investments are as follows:

Sector Specific Diversification

A strong range of investment options with access to more than one specialist manager within each asset class. This approach captures the competitive advantages of each manager. We anticipate this will provide higher returns than can be obtained from using diversified funds with, say, only one fund manager.

Simplicity

Consolidated reporting from Colonial First State.

Ease of Management

Automatic investment re-balancing and switching to help you easily and conveniently keep your investment strategies on track.

- We recommend that annual automatic rebalancing is elected.

Highly competitive and simple to understand fee structure

- No entry fee applies to this investment however, with your agreement; your Financial Adviser may wish to charge a one-off fee for upfront costs.
- You can agree with your Financial Adviser to have an ongoing Adviser Service Fee for advice paid directly from your investment. The ongoing fee will be deducted monthly from your investment options.
 - **A \$2,400 p.a. Adviser Service fee will apply.**
- No switching fees or exit fees apply to this investment.

Reversionary Pensions

Recommendations:

When you both commence your 'Colonial Wholesale Allocated Pension' accounts you should make them **reversionary**.

Benefits:

- A reversionary pension enables your tax dependant beneficiary to receive your pension account balance remaining within the superannuation environment. All moneys received by the reversionary beneficiary remain in pension phase and therefore all income earned by the fund or capital gains realised by the fund to pay the benefit pension will not be subject to tax.
- If either the deceased or the recipient of the reversionary pension is over the age of 60, the income stream will not be assessable for income tax purposes.

Risks:

- Death benefits in the form of a pension may only be paid to a "Tax Dependant". As your children are not classified as a tax dependants, in the event that you were both to die, they would only be able to receive a lump sum, thus would not receive the benefits of being in pension phase or within superannuation.
- If the income stream is commuted (either rolled into an accumulation fund or lump sums are withdrawn) within six months after the death of the deceased or 3 months after the grant of probate of that deceased person's will or letters of administration of that deceased person's estate, then it is treated as a death benefit payment. Therefore, the moneys would be treated as a lump sum benefit outside of the superannuation environment.

Downsizer Contributions

Currently, individuals of age 65 and over are able to contribute an amount equal to all or part of the sale proceeds from the sale of their main residence, of up to \$300,000 each into super. However, this is changing as of the 1st of July 2022, individuals can be of age 60 and over to be eligible for a downsizer contribution. Downsizer contributions can be made regardless of the other contributions caps and restrictions that might apply to making voluntary contributions, ie age restrictions or work test requirements. There is no upper age limit on making downsizer contribution.

A member satisfies eligibility requirements if:

- The contributor is of age 60 from the 1st of July 2022 at the time of the contribution.
- The contribution is capped at \$300,000 per person.
- The main residence was owned by the individual, spouse or former spouse for 10 or more years prior to the sale.
- The contribution must be made into the fund within 90 days of the change of ownership.

Recommendation:

- You have stated that you intend to sell your residential home at some stage in the coming years and downsize to a property valued at around \$800-\$900k.
- This will result in net proceeds (surplus cash) of around \$1.1 million.
- Based on the 'Downsizer' rule and current non-concessional contribution caps, it is recommended (at the time) to make the following contributions to superannuation:

Who	Type of contribution	Amount
Sharon	Downsizer	\$300,000
Sharon	Non-concessional	\$250,000
Wayne	Downsizer	\$300,000
Wayne	Non-concessional	\$250,000
Total		\$1,100,000

Benefits:

- Any assets held within the fund are effectively being held in the most tax effective environment.
- The returns on balances held within superannuation and invested should be higher than the current returns on cash held in bank deposits.

Risks:

- Superannuation benefits are subject to market returns and earning rates are not guaranteed.

Retirement Capital Projections

Wayne and Sharon, we have taken the liberty of providing superannuation retirement projections based on the following scenarios:

- Capital value of superannuation increases by 4.0% p.a.
- Capital value of superannuation increases by 6.0% p.a.
- Capital value of superannuation increases by 8.0% p.a.
- Drawing down \$60,000 p.a. from super.
- Drawing down \$70,000 p.a. from super.
- Drawing down \$80,000 p.a. from super.

Scenario 1 – without downsizing residential property:

- Implementation of recommended Allocated Pension funds (*including the \$50,000 non-concessional contribution into Sharon's new CFS super fund*).

Retirement Projections

- Under each of these scenarios we have calculated your projected superannuation capital position in 20 years' time (age 82 and 80 respectively).
- A summary of these projections (after 20 years) is detailed in the following tables:
