Reasons for seeking advice

You have sought our advice to establish a robust financial framework that reduces complexity and stress, allowing you to proactively manage your financial future. You are currently juggling significant family and work commitments, with David in a senior national role at Haymes Paints and Elizabeth focused on caregiving for your three children, Ollie (17), Charlie (14), and Lily (13). Your financial situation includes a substantial home loan, a large investment portfolio, and modest superannuation balances, with a Testamentary Trust of approximately \$1,000,0

You wish to address several key areas, including optimising your mortgage structure to reduce non-deductible debt, reviewing and consolidating your superannuation arrangements to improve efficiency and returns, ensuring your family is adequately protected through personal insurance, and formalising your estate planning strategy. A major focus is also on planning for your children's future, particularly Ollie's transition to university and his elite swimming commitments, and ensuring your broader family estate planning, including for parents and vulnerable beneficiaries, is structured effectively.

Your goals

- David and Elizabeth's goals
 - Reduce non-deductible home debt
Timeframe: 10-12 years
Current Status: Now
You are looking to reduce your non-deductible home loan of approximately \$1.2 million by implementing a more effective loan structure, including an offset account, to improve cash flow and accelerate debt repayment.

- Strengthen your retirement savings
Timeframe: Medium Term
Current Status: Now
 You have modest superannuation balances relative to your financial position and wish to implement strategies, such as consolidating funds and making catch-up concessional contributions, to boost your retirement savings.
- Protect your family from financial risk
Timeframe: Short Term
Current Status: Now
 You want to ensure your family is adequately protected against unforeseen events by reviewing and updating your personal insurance cover, including Life, Total and Permanent Disablement (TPD), and Income Protection.
- Organise financial and legal affairs
Timeframe: Short Term
Current Status: Now
 You wish to put a strong framework in place for your financial and estate planning documents to reduce stress and ensure your affairs are well-managed and proactive rather than reactive.

What our advice covers

Our advice is limited and does not address any areas any excluded areas of advice. It is important for you to be aware that you may have other financial planning needs and issues that this Statement of Advice does not address.

After you have read our advice, if you feel that you would like advice in any areas not addressed, or if you would like to vary the advice in any way, please contact us and we will be happy to assist.

Included areas of advice:

- Superannuation and Retirement Planning
- Personal Investment/Wealth Creation Planning
- Testamentary Trust Investments
- Taxation Planning
- Estate Planning
- Debt Management

Excluded areas of advice:

- Social Security Planning

Summary of our advice

Our advice is to strategically restructure your key financial pillars. We recommend you refinance your home loan to a new lender to secure a more competitive rate and a large offset account, which will improve cash flow and accelerate debt reduction. We also recommend consolidating your and Elizabeth's separate superannuation accounts into a single, more cost-effective platform and investing the proceeds into the Lakeside MS Balanced Portfolio. To significantly boost Elizabeth's retirement savings and optimise your tax position, we advise making a substantial catch-up

concessional contribution. Finally, we will conduct a thorough review of your personal insurance policies to ensure your family is adequately protected.

How our advice places you in a better position

Implementing our recommendations will create a more coordinated, cost-effective, and tax-efficient financial strategy. Refinancing your home loan will generate significant interest savings and provide greater financial flexibility. Consolidating your superannuation will reduce administration fees, simplify management, and align your retirement savings with a professionally managed investment strategy suited to your goals. Utilising the catch-up contribution for Elizabeth will provide a substantial, immediate boost to her super balance while delivering a significant tax deduction. A comprehensive insurance review will provide peace of mind that your family's financial security is protected against unforeseen events. Collectively, these strategies will place you in a stronger financial position to achieve your long-term goals of debt freedom and a comfortable retirement.

Cost of our advice

- Initial advice fee (for the preparation of our advice) \$XX
- Implementation fees or insurance commissions (one off to implement our recommendations) \$XX
- Further fees or insurance commissions (per annum if you proceed with our recommendations) \$XX

For full details of costs, please refer to the sections 'Costs of our advice' and 'Product costs' later in this document.

About you

Our advice is based on the information you provided to us and our understanding of your situation. Please review this information carefully to ensure the details are accurate.

Note: Details of Elizabeth's personal insurance cover within her Hostplus account were not provided.

Inaccurate and incomplete information warning

Where information relating to your circumstances is incomplete or inaccurate, you should before acting on my advice consider the appropriateness having regard to your goals, objectives and financial situation.

The following information relating to your circumstances was either not provided or may be based on inaccurate information:

- Copies of your parents' Wills and Powers of Attorney, which are relevant to your broader estate planning considerations.
- Details of any insurance cover held by Elizabeth within her Hostplus superannuation account.
- A detailed breakdown of your annual household living expenses.
- The outstanding balance and terms of your car loan.

Strategy recommendations

When preparing our recommendations, we considered your current situation and the goals and objectives that you want to achieve.

David and Elizabeth's goal

To simplify the management of your superannuation and improve investment outcomes.

Short Term

Advice to help you achieve this

Consolidate your superannuation

We recommend you consolidate David's AMP SignatureSuper and Elizabeth's Hostplus super into a new superannuation platform. The recommended platform will allow investment in the "Lakeside

MS Balanced Portfolio". This move is aimed at reducing fees, improving investment options, and simplifying management.

Benefits

- **Fee Reduction:** Consolidating your super into a single account will eliminate duplicate administration fees, potentially saving you thousands of dollars over the long term.
- **Simplified Management:** It's much easier to track and manage one super account than multiple accounts across different providers.
- **Improved Investment Strategy:** A single account allows for a more cohesive and effective investment strategy, tailored to your risk profile and retirement goals.
- **Easier Estate Planning:** Managing beneficiaries and estate planning is simpler with a single super fund.

Things you should know

- **Loss of Insurance:** You may lose valuable insurance cover held within your existing super funds. It is crucial to arrange for replacement cover before consolidating.
- **Investment Performance:** The new fund's investment performance may not be as good as your old funds.
- **Transaction Costs:** There may be buy/sell spreads or other transaction costs when you switch investments.

David and Elizabeth's goal

To align your superannuation investments with your risk profile for long-term growth.

Long Term

Advice to help you achieve this

Implement a new investment strategy

We recommend you invest the consolidated superannuation balance in the "Lakeside MS Balanced Portfolio". This is a diversified portfolio aligned with a balanced risk profile.

Benefits

- **Diversification:** The balanced portfolio is diversified across a range of asset classes, which helps to manage risk.
- **Professional Management:** The portfolio is managed by investment professionals, saving you the time and expertise required to manage your own investments.
- **Long-Term Growth:** The portfolio is designed to provide moderate long-term growth, consistent with a balanced risk profile.

Things you should know

- **Market Fluctuations:** The value of your investment will fluctuate with the market, and you may experience periods of negative returns.
- **Investment Risk:** All investments carry some level of risk, and there is no guarantee that the portfolio will achieve its investment objectives.
- **Fees and Costs:** There are fees and costs associated with the management of the portfolio, which will impact your overall returns.

Elizabeth's goal

To boost your retirement savings and optimise your tax position.

Short Term

Advice to help you achieve this

Make additional superannuation contributions

We recommend you make a significant concessional contribution to Elizabeth's superannuation to utilise her \$126,603.10 of available carry-forward concessional contributions. This is a key strategy to boost her retirement savings and claim a significant tax deduction.

Benefits

- **Tax Deduction:** Elizabeth can claim a tax deduction for the personal concessional contribution, which will reduce her taxable income and result in a significant tax saving.
- **Boost Retirement Savings:** This is a powerful strategy to accelerate the growth of Elizabeth's superannuation balance.
- **Spouse Contribution Splitting:** There may be opportunities to split some of David's concessional contributions to Elizabeth's account in the future.

Things you should know

- **Contribution Caps:** You must ensure that you do not exceed the concessional contribution cap, including the carry-forward amount. Exceeding the cap will result in additional tax.
- **Preservation:** The contributed amount will be preserved in superannuation until Elizabeth meets a condition of release.

David and Elizabeth's goal

To ensure your family is adequately protected financially from unexpected events.

Short Term

Advice to help you achieve this

Review and update your personal insurance

We recommend you conduct a comprehensive review of David and Elizabeth's life, TPD, and income protection insurance. The current cover is likely inadequate. The review should determine appropriate levels of cover and the best structure (e.g., inside or outside super).

Benefits

- **Peace of Mind:** Adequate insurance cover provides peace of mind, knowing that your family will be financially secure in the event of your death, disability, or serious illness.
- **Financial Protection:** Insurance proceeds can be used to pay off debts, cover living expenses, and provide for your children's future.
- **Debt Repayment:** Life and TPD insurance can be used to repay the mortgage and other debts, relieving your family of a significant financial burden.

Things you should know

- **Premium Costs:** Insurance premiums can be a significant expense, and you need to ensure they are affordable within your budget.
- **Policy Exclusions:** All insurance policies have exclusions and conditions that you need to be aware of.
- **Underwriting:** When you apply for new insurance, you will need to undergo medical underwriting, and there is no guarantee that you will be offered cover.

David and Elizabeth's goal

To provide financial protection for your children's health and future insurability.

Medium Term

Advice to help you achieve this

Review child insurance options

We recommend you review and consider insurance options for the children, such as trauma cover and future insurability options. This can provide a lump sum to cover costs in the event of a serious childhood illness and guarantee their ability to get cover as adults, regardless of future health changes.

Benefits

- **Financial Support during a difficult time:** A lump sum payment from a child's trauma policy can provide financial support if your child suffers a serious illness or injury, allowing you to take time off work to care for them.
- **Guaranteed Future Insurability:** A child advancement benefit can guarantee your child's ability to obtain life and/or trauma insurance as an adult, regardless of their future health.

Things you should know

- **Cost:** The premiums for child insurance will add to your family's expenses.
- **Policy Definitions:** The definitions of the medical conditions covered by a trauma policy can be very specific, and not all illnesses are covered.

Alternative strategies considered

When preparing our recommendations, we considered the following options.

- **Retain existing superannuation funds:** We considered retaining your existing AMP and Hostplus superannuation accounts. However, this was not recommended as it would mean continuing to pay multiple sets of administration fees, making it more difficult to manage your overall portfolio, and potentially missing out on the investment opportunities and fee structures available through the recommended platform.
- **Restructure or refinance home loan:** We considered options to restructure or refinance your home loan to secure a more competitive interest rate and an offset facility. However, based on a review of your current credit file, this is not a viable option at this time. We will revisit this strategy in 12-24 months once your credit score has had time to improve.
- **Do nothing and retain current insurance cover:** This was rejected as our review identified that your existing levels of Life, TPD, and Income Protection cover are likely inadequate to fully protect your family and service your significant debt in the event of death, disability or illness.
- **Government Co-contribution for Children:** We considered this strategy as a way to boost savings for your children. However, this is not a viable strategy at this time as the children do not meet the eligibility criteria, as they do not have employment income and therefore cannot make personal contributions to superannuation to receive the co-contribution.

Your risk profile

Your attitude and tolerance towards risk is an important aspect in determining the range of strategies and investment options which may be appropriate to help you achieve your needs and objectives. Based on the information provided and from my discussions with you, your risk profile is detailed below:

Please tell us immediately if you feel that this does not accurately describe your attitude to risk and investment.

	Risk Profile
David McCormack	Balanced
Elizabeth McCormack	Balanced
Joint	Balanced

Investor Profile - Balanced / 60% Growth - 40% Defensive Assets

A Balanced investor is willing to accept moderate risk to achieve moderate long-term returns. They understand that the value of their investments will fluctuate and are prepared to accept some short-term volatility in pursuit of capital growth over the medium to long term. Their portfolio will have a relatively even mix of growth and defensive assets, aiming to balance the potential for higher growth from shares and property with the stability offered by cash and fixed interest.

Target Asset Allocation

Asset	Weight (%)
Australian Fixed Interest	18.00%
Australian Shares	22.50%
Cash	5.00%
International Fixed Interest	17.00%
International Property/Infrastructure	7.00%
International Shares	30.50%

Asset	Weight (%)
TOTALS	100%

Investment product recommendations

David McCormack

FirstChoice Wholesale Personal Super

Overview

We recommend consolidating your existing AMP SignatureSuper into the Colonial First State FirstChoice Wholesale Personal Super account. This is a superannuation wrap platform that offers a wide range of investment options, including managed funds and direct shares, providing a flexible and central hub for your retirement savings.

This will enable you to: Consolidate your superannuation

Advice

We have recommended the FirstChoice Wholesale Personal Super platform for the following reasons:

- **Investment Choice:** The platform provides access to the recommended 'Lakeside MS Balanced Portfolio', which is not available in your current fund. It also offers a broad menu of other investment options should your strategy change in the future.
- **Consolidation & Simplicity:** By consolidating both your and Elizabeth's superannuation onto a single platform, it simplifies administration, provides clearer consolidated reporting for your family group, and makes your overall financial structure easier to manage.
- **Cost-Effectiveness:** This platform allows for 'family fee aggregation', meaning your and Elizabeth's account balances can be combined for the purpose of calculating administration fees. This can lead to significant cost savings over the long term compared to running separate accounts on different platforms.
- **Features:** The platform offers valuable features such as automatic portfolio rebalancing, which helps ensure your investments remain aligned with your target asset allocation over time.

Things you should know

All investments carry risk, and the value of your superannuation can fall as well as rise. By implementing this recommendation, you will be exiting your current AMP SignatureSuper plan. This will mean any insurance cover you hold within that account will cease. It is a critical part of our advice that you do not cancel your existing super account until a full insurance review has been completed and any recommended replacement cover is in place. Further details about the recommended product, including its features, fees, and risks, are available in the Product Disclosure Statement (PDS).

Elizabeth McCormack

FirstChoice Wholesale Personal Super

Overview

We recommend consolidating your existing Hostplus superannuation account into the Colonial First State FirstChoice Wholesale Personal Super account. This platform will also be used to receive your recommended catch-up concessional contribution. This will centralise your retirement savings into a single, flexible account.

This will enable you to: Consolidate your superannuation and make catch-up concessional contributions

Advice

We have recommended the FirstChoice Wholesale Personal Super platform for the following reasons:

- **Alignment with Family Strategy:** Using the same platform as David allows for a unified investment strategy and simplifies the management of your combined financial affairs.
- **Cost-Effectiveness:** By linking your account with David's, you can benefit from 'family fee aggregation'. This combines both your balances when calculating administration fees, which can reduce the percentage-based fees you pay.
- **Investment Strategy Implementation:** The platform allows for investment in the 'Lakeside MS Balanced Portfolio', which aligns with your balanced risk profile and long-term objectives.
- **Facilitates Contributions:** The platform is well-suited to receive your large one-off catch-up concessional contribution and manage the investment of these funds in line with the recommended strategy.

Things you should know

All investments carry risk, and the value of your superannuation can fall as well as rise. By implementing this recommendation, you will be exiting your current Hostplus super plan. If you hold any insurance cover within that account, it will cease upon rollover. We will conduct a full review of your insurance needs and ensure appropriate cover is in place before this rollover occurs. Further details about the recommended product, including its features, fees, and risks, are available in the Product Disclosure Statement (PDS).

Recommended portfolio for David McCormack

We have recommended the 'Lakeside MS Balanced Portfolio' for your superannuation investments. This is a professionally constructed and managed portfolio of funds, diversified across various asset classes and investment managers. The portfolio has been selected as it aligns with your 'Balanced' investor risk profile, aiming to provide moderate long-term growth while managing downside risk.

The following table outlines our recommendations for your portfolio.

Investments	Current (\$)	Change (\$)	Proposed (\$)	Proposed (%)
AMP SignatureSuper				
Future Directions Balanced	\$418,082.95	-\$418,082.95	\$0.00	0.00%

Sub Total	\$0.00	\$418,082.95	\$418,082.95	100.00%

Ongoing portfolio instructions and management

- We recommend an automatic rebalance feature to realign your investment portfolio with your target asset allocation on a quarterly basis. A 5% tolerance level will be set to prevent the rebalancing of significantly low amounts.

- Our portfolio recommendations include cash of \$20,904.15 / 5.00%. This is the minimum cash balance required within the model portfolio and will be used to pay for administration and investment fees, as well as adviser service fees.
- Future contributions will be allocated proportionately across the recommended investments to maintain the portfolio's target allocation.
- Investment income will be reinvested into the underlying fund to benefit from compounding returns.

Proposed asset allocation for David McCormack

The following provides an illustration of your asset allocation after the portfolio recommendations are implemented.

Proposed Asset Allocation for David McCormack

Asset Class	Proposed value	Proposed weight	Target weight	Variance
Defensive Assets				
Cash	\$20,904.15	5.00%	N/A	N/A

Asset allocation commentary

After the changes, your asset allocation will be 40% in defensive assets and 60% in growth assets. This is in line with the strategic asset allocation of the 'Lakeside MS Balanced Portfolio' and is considered appropriate for an investor with a Balanced risk profile seeking moderate long-term growth.

Recommended portfolio for Elizabeth McCormack

We have recommended the 'Lakeside MS Balanced Portfolio' for your superannuation investments. This is a professionally constructed and managed portfolio of funds, diversified across various asset classes and investment managers. The portfolio has been selected as it aligns with your 'Balanced' investor risk profile, aiming to provide moderate long-term growth while managing downside risk.

The following table outlines our recommendations for your portfolio.

Investments	Current (\$)	Change (\$)	Proposed (\$)	Proposed (%)

Other Assets				
[other assets]	\$0.00	0.00%	N/A	N/A
Total Other	\$0.00	0.00%	N/A	N/A

Asset allocation commentary

After the changes, your asset allocation will be 40% in defensive assets and 60% in growth assets. This is in line with the strategic asset allocation of the 'Lakeside MS Balanced Portfolio' and is considered appropriate for an investor with a Balanced risk profile seeking moderate long-term growth.

Alternative products considered

In formulating our recommendations, we considered retaining your existing superannuation funds, AMP SignatureSuper for David and Hostplus for Elizabeth. While these are respectable funds, we concluded that consolidating to a single platform would provide significant benefits. The recommended approach allows for a unified investment strategy across the family group, simplifies administration and reporting, and provides access to a broader range of investment options including the professionally managed model portfolio, which is better aligned with your goals. Furthermore, consolidating to Colonial First State offers the potential for fee savings through family fee aggregation, which would not be possible if the accounts remained separate.

Investment replacement of product for David McCormack

We have recommended replacing your existing product.

Reasons for replacing product

In light of the cost and benefit analysis above, replacing your current product was deemed appropriate because it allows for the implementation of a cohesive investment strategy through the 'Lakeside MS Balanced Portfolio'. This platform provides superior investment choice and flexibility compared to your existing corporate plan. Consolidating both your and Elizabeth's superannuation onto a single platform simplifies administration, provides clearer consolidated reporting, and enables family fee aggregation, which can lead to cost savings over time. This aligns with your goal of creating a more streamlined and efficient financial structure.

Consequences of replacing the product

You should be aware that by replacing your current product, you will lose the existing Death, Total and Permanent Disablement, and Income Protection insurance cover held within your AMP SignatureSuper account. It is critical that replacement insurance cover is approved and in place before the rollover is finalised to ensure you are not left without protection. There will also be transaction costs, such as buy/sell spreads, incurred when selling the investments in your current fund and purchasing the new investments.

Comparison costs for David McCormack

The tables below compare your existing product with our recommended product.

Plan Costs	Existing AMP SignatureSuper	Proposed FirstChoice Wholesale Personal Super
Account Balance	\$418,082.95	\$418,082.95
Administration Fees	\$729.33 0.17%	\$836.17 0.20% (Est.)
Trustee Fees	\$5.23 0.001%	\$0.00 0.00%
Investment Fees and Costs	\$2,475.23 0.59%	\$2,717.54 0.65% (Est.)

Plan Costs	Existing AMP SignatureSuper	Proposed FirstChoice Wholesale Personal Super
Membership Fee	\$78.00 0.02%	\$0.00 0.00%
Net Ongoing Product Costs (per annum)	\$3,287.79 0.79%	\$3,553.71 0.85%
Adviser Service Fee	\$0.00 0.00%	\$0.00 0.00%
Insurance Premium	\$2,308.80 0.55%	TBC
Less Total Rebates	(\$121.87)	(\$0.00)
Net Ongoing Costs (per annum)	\$5,474.72 1.31%	\$3,553.71 + Insurance 0.85% + Insurance

Difference in ongoing product costs: Additional \$265.92. Note: This comparison is before the application of family fee aggregation on the proposed platform, which is expected to reduce the administration fee. The key benefits of the change are related to investment strategy and consolidation rather than direct fee savings on a standalone basis.

Transaction costs

The following table shows the transaction costs that may apply to replace your existing products with the recommending products.

Plan Costs	Existing AMP SignatureSuper	Proposed FirstChoice Wholesale Personal Super
Exit / Withdrawal Fees	\$0.00	\$0.00
Buy / Sell Spread*	\$836.17	\$0.00
Capital Gains Tax^	\$0.00	\$0.00

*Please note that this figure consists of transaction costs incurred by your existing product, as well as your recommended product. For simplicity we have combined the two as a single proposed cost to replace your existing product. This is an estimate based on 0.20% of the balance rolled over.

^This figure is the estimated Capital Gains Tax incurred to replace your existing product. This amount is deducted from your existing product prior to rolling over to the recommended product. For superannuation rollovers, no CGT is payable by the member.

Comparison benefits and features for David McCormack

Every product has different features and benefits. The table below outlines some of the differences between your existing fund(s) and the proposed fund(s). Please let us know if the loss of any of these causes you concern.

Features and Benefits	Existing AMP SignatureSuper	Proposed FirstChoice Wholesale Personal Super
Number of investment options	< 20	500+
Free Investment switches	✓	✓
Administration to direct shares	X	✓
Online switching	✓	✓
Auto rebalancing	X	✓
In specie transfer of assets	X	✓
Binding Nominations	✓	✓
Annual Report	✓	✓
Half annual statements	✓	✓
Online account access	✓	✓
Regular newsletters	✓	✓
Administration fee aggregation	X	✓
Family accounts discount	X	✓
Bpay contributions	✓	✓
Spouse contributions	✓	✓
Contribution splitting	✓	✓

Extended Comparison Information

The replacement will result in the following benefits lost:

- The existing Death, TPD and Income Protection insurance cover held within your AMP SignatureSuper account. It is critical that new cover is in place before the rollover is finalised.
- Any specific features or loyalty benefits associated with the Haymes Paint Superannuation Plan corporate arrangement.

The replacement will result in the following benefits gained:

- Access to a significantly wider range of investment options, including the recommended model portfolio.
- Ability to aggregate family accounts with Elizabeth to receive fee discounts.
- Simplified administration and consolidated reporting for your family.

- Automated portfolio rebalancing to ensure your investments remain aligned with your strategy.

Investment replacement of product for Elizabeth McCormack

We have recommended replacing your existing product.

Reasons for replacing product

In light of the cost and benefit analysis above, replacing your current product was deemed appropriate because it facilitates the consolidation of your and David's superannuation into a single, easy-to-manage structure. This provides access to the recommended 'Lakeside MS Balanced Portfolio', which is aligned with your investment objectives. The new platform offers greater investment flexibility and allows for family fee aggregation, which can lead to reduced administration fees over the long term. This helps you meet your goal of creating a more organised and effective financial plan.

Consequences of replacing the product

You should be aware that replacing your current product will cause any insurance cover held within your Hostplus account to cease. We will undertake a comprehensive review of your insurance needs and ensure any required cover is in place before finalising the rollover to prevent any period of non-insurance.

Comparison costs for Elizabeth McCormack

The tables below compare your existing product with our recommended product.

Plan Costs	Existing Hostplus Super	Proposed FirstChoice Wholesale Personal Super
Account Balance	\$121,543.90	\$248,147.00
Administration Fees	\$199.54 0.16% (Est.)	\$496.29 0.20% (Est.)
Investment Fees and Costs	\$1,033.12 0.85% (Est.)	\$1,612.96 0.65% (Est.)
Net Ongoing Product Costs (per annum)	\$1,232.66 1.01%	\$2,109.25 0.85%
Adviser Service Fee	\$0.00 0.00%	\$0.00 0.00%
Insurance Premium	\$0.00	TBC
Net Ongoing Costs (per annum)	\$1,232.66 1.01%	\$2,109.25 + Insurance 0.85% + Insurance

Difference in ongoing in costs: The proposed total fee percentage (0.85%) is lower than your existing estimated fee percentage (1.01%). The total dollar cost is higher due to the significantly increased account balance following your catch-up contribution. This change puts you in a better position due

to lower percentage-based fees, access to a superior investment platform, and the benefits of family fee aggregation.

Transaction costs

The following table shows the transaction costs that may apply to replace your existing products with the recommending products.

Plan Costs	Existing Hostplus Super	Proposed FirstChoice Wholesale Personal Super
Exit / Withdrawal Fees	\$0.00	\$0.00
Buy / Sell Spread*	\$243.09	\$0.00
Capital Gains Tax^	\$0.00	\$0.00

* Please note that this figure consists of transaction costs incurred by your existing product, as well as your recommended product. For simplicity we have combined the two as a single proposed cost to replace your existing product. This is an estimate based on 0.20% of the balance rolled over.

^This figure is the estimated Capital Gains Tax incurred to replace your existing product. This amount is deducted from your existing product prior to rolling over to the recommended product. For superannuation rollovers, no CGT is payable by the member.

Comparison benefits and features for Elizabeth McCormack

Every product has different features and benefits. The table below outlines some of the differences between your existing fund(s) and the proposed fund(s). Please let us know if the loss of any of these causes you concern.

Extended Comparison Information

The replacement will result in the following benefits lost:

- Any insurance cover held within your Hostplus account will cease.
- The low flat-dollar administration fee structure typical of an industry fund.

The replacement will result in the following benefits gained:

- Access to a significantly wider range of investment options, including the recommended model portfolio.
- Ability to aggregate family accounts with David to receive fee discounts, which is expected to make the platform more cost-effective.
- Simplified administration and consolidated reporting for your family.
- Automated portfolio rebalancing to ensure your investments remain aligned with your strategy.

Insurance strategy recommendations

When preparing our recommendations, we considered your current situation and the goals that you want to achieve.

David & Elizabeth McCormack's goal

To ensure that you and your family are financially protected in the event of death, disability or serious illness by reviewing your personal insurance portfolio.

[Short Term]

Advice to help you achieve this

Review and Update Personal Insurance Portfolio

We recommend that you and Elizabeth apply for appropriate levels of Life, Total and Permanent Disablement (TPD), and Trauma insurance to address the shortfalls identified in our analysis. For David, we also recommend increasing your Income Protection cover and extending the benefit period.

Benefits

- Adequate insurance cover provides peace of mind, knowing that your family will be financially secure in the event of your death, disability, or serious illness.
- Insurance proceeds can be used to pay off debts, cover living expenses, and provide for your children's future.
- Life and TPD insurance can be used to repay the mortgage and other debts, relieving your family of a significant financial burden.
- A lump sum payment from a child's trauma policy can provide financial support if your child suffers a serious illness or injury, allowing you to take time off work to care for them.
- A child advancement benefit can guarantee your child's ability to obtain life and/or trauma insurance as an adult, regardless of their future health.

Things you should know

- Insurance premiums can be a significant expense, and you need to ensure they are affordable within your budget.
- All insurance policies have exclusions and conditions that you need to be aware of.
- When you apply for new insurance, you will need to undergo medical underwriting, and there is no guarantee that you will be offered cover.
- The premiums for child insurance will add to your family's expenses.
- The definitions of the medical conditions covered by a trauma policy can be very specific, and not all illnesses are covered.

Alternative strategies considered

When preparing our recommendations, we considered the following options.

- **Maintain your existing insurance policies:** We considered retaining David's current insurance cover within his AMP Super account. We did not recommend this strategy as the level of cover is inadequate to meet your needs. Specifically, the Life and TPD cover is insufficient to repay your mortgage and provide for your family, and the Income Protection benefit period of two years would not protect against a long-term disability. This would leave your family exposed to significant financial risk.
- **Self-insure against death and disability:** This involves relying on your existing assets to provide for your family if an unexpected event occurs. We did not recommend this strategy as your current asset base would be insufficient to cover all liabilities (such as your home loan of over \$1.1 million) and provide the ongoing income required for your family's living and education expenses. Attempting to self-insure would place your family's financial security and long-term goals at significant risk.

Cost of our advice

The advice fees and product fees associated with our recommendations are shown below. Please also refer to the 'Important relationships and information'.

Initial advice

The following fees apply for the preparation and implementation of our advice.

Description	Calculation information	How is this Paid	When is this Payable	Amount p.a. (including GST)
Statement of Advice Preparation and Implementation Fee	Flat fee	By Direct Debit	In Advance	\$3,300
Totals				\$3,300

Implementation

The following fees and costs apply to implement our recommendations.

Description	Calculation information	How is this Paid	When is this Payable	Amount p.a. (including GST)
New Insurance Policies	Up to 66% of premium	By insurer	Upon acceptance	To be confirmed
Totals				commissions

Further remuneration

The following fees and costs apply if you proceed with our recommendations.

Description	Calculation information	How is this Paid	When is this Payable	Amount p.a. (including GST)
Adviser Service Fee	0.75% p.a. of the investment balance held on the Colonial First State FirstChoice platform, calculated on the daily balance.	Deduction from Product	Monthly in arrears	\$4,500
New Insurance Policies	Up to 22% of premium	By insurer	Annually upon renewal	To be confirmed
Totals				\$4,500 + commissions

Please note the following:

- Insurance commission is calculated as a percentage of the premium less stamp duty. Commissions are already incorporated into the premium and are not an additional cost to you. The premium quoted above is based on an annualised premium. The insurance premium and commission amount shown above are estimates for the first year. The actual amounts may vary and may increase in future years.
- Advice fees will either be a flat fee, or a percentage-based fee based on the value of your investment/superannuation. Any costs based on a percentage may vary over time and, as such, the dollar amounts shown should only be used as a guide.

Product costs

Various costs payable to product and service providers to cover expenses associated with buying and administering the product are shown in the tables below.

Description	Amount (%)	Amount (\$)
Account: Colonial First State FirstChoice Wholesale Personal Super		
Administration fee	[X.XX]%	[\$XX]

RQI Global Value	[X.XX]%	[\$XX]
Schroder Australian Equity	[X.XX]%	[\$XX]
Total		[\$XX]

Please note the following:

- We have provided an overview of the key product costs associated with our advice. It is important that you read the relevant Product Disclosure Statement to understand the full list of costs, how these costs are calculated and any special rules that apply.
- Administration fees are deducted from the account balance.
- Any costs based on a percentage may vary over time and, as such, the dollar amounts shown above should only be used as a guide.
- Fees may include Reduced Input Tax Credits (RITC).
- Fund Managers charge an Indirect Cost Ratio (ICR) fee to cover the costs associated with managing each individual underlying investment. ICR costs are generally deducted from the unit price. This aggregate fee may include expenses such as model management fees, trusteeship fees, legal, accounting and auditing costs.

Important relationships and information

Adviser benefits, interests and associations

We may receive benefits or payments from other sources. The table below outlines any benefits, interests or associations that may be capable or reasonably seen to be capable of influencing my advice. It includes payments or benefits to the Business, and associated entity and/or I, and/or where another party may benefit financially as a result of your business.

Type of benefit or interest	Description
Remuneration	• My remuneration is a combination of salary, a potential bonus and a share of profits from the business. Should I be eligible for a bonus payment, this is reliant upon a range of criteria including compliance, education, customer experience and revenue targets.
Shareholdings	• N/A
Referrals to other parties	• Stephen McConville (Findex) ○ No referral fee or commission is passed onto the Business or I

Type of benefit or interest	Description
	should you utilise their services.
Other forms of remuneration or benefits	• Information technology support • Education and training support • Advice service support • Non-cash benefits

I maintain an Alternative Remuneration Register that contains information about any benefits received.

Licensee benefits, interests and associations

The table below outlines any benefits, interests or associations of the Licensee and its related companies. It includes benefits to the Licensee and/or where a related party may benefit financially as a result of your business.

Type of benefit or interest	Description
Related parties	The Licensee (AFSL 418 700) maintains relationships with a range of product and service providers to ensure we have access to a wide range of products to meet your needs. Some of these providers may pay a fee to the Licensee to be included on our Approved Product List. These payments are not shared with me or Lakeside Financial Pty Ltd and do not influence the recommendations made.

Disclaimers

Type of disclaimer	Description
SoA Restrictions	This SoA is prepared solely for the use of the client/s to whom it is addressed and the Licensee and/or its associated companies do not accept any liability whatsoever to third parties.
Currency of SoA	The recommendations in this SoA should only be considered current for 90 days from the date of this SoA. After that time, you should not act on any of the recommendation without further reference to us for a review and, if necessary, preparation of a revised SoA.

Type of disclaimer	Description
Projections	Projections are based on estimates and are intended as a guide only and must not be relied upon as forecasts.
Approved Product List (APL)	We can only recommend financial products that are on our APL unless we seek special approval to recommend other products that may be more appropriate and in your best interests.
Cooling Off Rights	You may have the right to cancel certain financial products and obtain a refund within the cooling off period. Typically, the cooling off period is 14 days however this may vary and does not apply to all products. Please read the PDS for details. If you would like to cancel a product please let us know as soon as possible.
No Product Guarantee	The Licensee and/or its associated companies do not warrant or guarantee the financial performance, stability or security of any financial product or service recommended. They are subject to risks, including delays in payment of redemptions, the loss of investment value including principal invested, and the potential that an insurance claim may be declined. You should be aware that past performance of a financial product is not a reliable indicator of future performance.
